- CGPA: 6.38
- Branch: Mechanical Engineering

WORK EXPERIENCE

LOMAA IT SOLUTIONS(30+ employee venture-backed recruitment startup)

Tirupati, AP

Full stack Web Developer

Feb 2023-2024

- Demonstrates exceptional expertise in both frontend and backend development, consistently delivering high-quality solutions across multiple projects. Exhibits versatility in tackling diverse technical challenges, ensuring smooth functionality and user-friendly interfaces.

Effective Team Leadership:

- Successfully leads cross-functional teams comprising diverse skill sets, fostering collaboration and synergy to achieve project goals. Provides clear direction, support and mentorship to team members, facilitating their professional growth while maintaining project timelines and standards.

Projects

Election Survey Project- Lomaa it Solutions

Tirupati, AP

Web Application

dec 2023-2024

Git Hub: https://github.com/Vasudeva8278/project_survey

Link: <https://www.cgysrcongress.in/login>

Integrated Technology Stack

- User interfaces developed effortlessly with ReactJS, known for its ease of use and comprehension.
- Server logic and APIs endpoints seamlessly managed with Django, appreciated for its intuitive structure and simplicity.
- Database: MySQL employed to store voter data and survey results. Version Control: Collaborative development facilitated by Git.

Website of Lomaa- Lomaa it Solutions | ReactJS, Java Script, Django, python, API

Git Hub: https://github.com/Vasudeva8278/Lomma_website

Link: <https://lomaa.it.com/>

Integrated Technology Stack

- Used for building the frontend interface of the polling survey application. React is popular for creating dynamic and interactive user interfaces.
- Employed for the backend development, handling server-side logic, database interactions, and serving the API endpoints for the frontend.

Foodie Web Applications- Self Projects

Git Hub: <https://github.com/Vasudeva8278/fun>

Integrated Technology Stack

- Frontend: Developed the user interface using React.js, ensuring a seamless and intuitive experience for user to browse menus, place orders, and track deliveries.
- Backend: Designed and implemented the backend functionality using Django, leveraging its robust features for authentication, data modelling, and APIs development.
- APIs: Created RESTful APIs in Django to handle requests from the frontend, enabling communication between the client and server.

Technical Skills

Languages: Python, java script, HTML/CSS, MySQL

Developer Tools: VS code, Eclipse

Technologies/Frameworks: Django Rest APIs & React JS, Git hub, HTTPs

Certifications: Python certification on Hacker Rank and MySQL certifications on Hacker Rank

Leadership/Extracurricular

- Managed executive board of 5 members and ran weekly meeting to oversee progression essential part of the chapter
- Lead chapter of 30+ members to work towards goals that improve and promote community service, academics, and unity
